

REMARKS

Favorable reconsideration is requested in view of the foregoing amendments and the following remarks.

I. Claim Status and Amendments

Claims 1-3, 5-12, 20-22, 27-31, 35, and 36 were pending in this application when last examined and stand rejected. Claims 4, 13-19, 23-26, 32-34, and 37-41 were previously cancelled.

The claims have been amended to address the formal matters raised in the Office Action. Support can be found throughout the general disclosure and the claims as filed. No new matter has been added.

For instance, claims 1 and 2 are amended to incorporate the definition of Y of claim 3, which has been cancelled without prejudice or disclaimer thereto. Applicants reserve the right to file a continuation or divisional on any cancelled subject matter.

Support for the revision to claim 1 to replace the objected term "aminoacyl" with "acylamino" can be found in the disclosure at page 11, line 16.

Support for the revision to claim 1 to specify R and R' can be found in the disclosure on page 6, lines 20-22.

Other minor editorial revisions have been made to the claims to better conform to US claim and practice and to correct grammar and punctuation.

No new matter has been added.

Claims 3 and 36 have been cancelled without prejudice or disclaimer thereto. Applicants reserve the right to file a continuation or divisional on any cancelled subject matter.

Claims 1, 2, 5-12, 20-22, 27-31, and 35 are pending upon entry of this amendment. These claims define novel and unobvious subject matter under Sections 102 and 103 of 35 U.S.C., and therefore should be allowed.

II. Provisional Double Patenting Rejection

In item 1 on page 2 of the Office Action, claims 1-3, 5-12, 20-22, 27-31, 35, and 36 were again provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being obvious over claims 1-16 of copending application serial No. 10/381,200 for reasons of record.

In item 2 on page 2, claims 1-3, 5-12, 20-22, 27-31, 35, and 36 were again provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being obvious over claims 1-16 of copending application serial No. 10/381,665 for reasons of record.

Since the rejections are provisional, Applicants respectfully request that they be held in abeyance until allowance of the instant application or the copending applications, in accordance with US practice. See MPEP § 804 I, B(1) and § 822.01

III. Indefiniteness Rejections on Pages 3-8

The Examiner maintained the rejections of claims 1, 11, and 12 under 35 U.S.C. §112, second paragraph, as being indefinite for the reasons in items 4(a)-(ss) on pages 3-8.

Claims 1-3, 5-12, 20-22, 27-31, 35, and 36 were rejected under 35 U.S.C. §112, second paragraph, as being indefinite for the reasons in items 11(a)-(qqqqqqqq) on pages 10-33 of the Office Action.

These rejections are traversed.

Applicants have amended the claims to better define the claimed subject matter more clearly and distinctively to overcome the rejections for reasons which are self-evident.

For instance, Applicants have amended claims 1 and 2 to incorporate the meaning of Y from claim 3 (which has been cancelled without prejudice or disclaimer).

Applicants here provide the following comments as to the Examiner's objections:

The objected species in items 4(b)- 4(ss) and in items 11 (s)-11 (kkkkkkkk) are referenced in the table below.

For these species, L¹ and R⁶ are H, and X is 0. It should be noted that species having a substituent in bold/italic in the table are not embraced in amended claims 1 and 2 and have been removed from claims 11 and 12. The other species are clearly embraced by amended claims 1 and 2. Therefore, the corresponding objections should be withdrawn in view of these amendments. Please note that when R³ is substituted with sulfonyl, that includes SO₂CF₃, according to the disclosure on page 7, lines 1-3 of the international publication.

As to the remaining issues in item 11 of the Office Action, it is believed that the present amendment overcomes these rejections for at least the following reasons (the numbering of which corresponds to item number in the Office Action):

(a) In reply to item (a), since "aminoacyl" has been changed to "acylamino" in response to item 9, the meaning of "acylamino" and "aminocarbonyl" are clearly distinct and in accordance with their definition on page 6, lines 20-25.

(b) In reply to item (b) Applicants have amended claim 1 to specify the meaning of R and R' according to the disclosure on page 6, lines 20-22.

(c) In reply to item (c), claim 1 has been revised to replace the incorrect term "C₁-C₆ alkyl,heteroaryl" with the correct term C₁-C₆ alkylheteroaryl", according to the disclosure on page 7 line 14.

(d) Claim 2 has been revised to replace "diastereoisomers" with "diastereoisomers" as supported by the disclosure at page 11, line 9.

(e) In claim 2, Applicants have amended the claim to specify the meaning of Rand R' according to the disclosure on page 6, lines 20-22.

(f) - (i) The rejections in items (f), (g), (h), and (i) are moot in view of the cancellation of claim 3 and the amendments to the claims. Specifically, claims 1 and 2 are amended to incorporate the definition of Y of 3. In doing so, Applicants note that the term "-NR³'C(O)NR³R³" has been revised to "-NR³'C(O)NR³'R³" as supported by the disclosure at page 9, line 12 of the international publication.

(j) - (k) Applicants have amended claim 5 to remove the meaning of Ar² so the claim is drawn only to Ar¹.

(l) The above-noted amendment to claim 1 to change "aminoacyl" to "acylamino" (in reply to item 9) renders this objection moot.

(m) In claim 7, Applicants have removed the "an unsubstituted or substituted" language.

(n) Claim 8 is amended to remove reference to the terms "thioxodihydropyridine and pyrazole."

(o) - (r) It is believed that the objections in items (o), (p), (q), and (r) are moot in view of the amended claims.

(11111111) The objection to claim 21 is moot in view of the amended claims.

(mmmmmmmm) Claim 21 is amended to insert a coma between the term "aryl-C₁-C₆-alkyl" and "heteroaryl-C₁-C₆-alkyl", according to the disclosure on page 11, lines 14.

(nnnnnnnn) This objection is moot in view of the amended claims.

(oooooooo) This objection is moot in view of the amended claims.

(pppppppp) Claim 21 is amended to remove the meaning of substituted or unsubstituted C₂-C₆ alkenyl of R³ and R^{3'}.

(qqqqqqqq) Claim 36 has been cancelled without prejudice or disclaimer.

It is believed that the present amendment overcomes the rejections. Thus, withdrawal of the rejections is requested.

IV. Written Description Rejections

Claims 1, 3, 20-22, 27, 28, and 31 were rejected under 35 U.S.C. §112, first paragraph, on the basis the specification lacks written description support for the claim language for the reasons in item 9 on page 9 of the Office Action. The Examiner argues that the definition of Ar¹, where the substituents include the moiety "aminoacyl", is not supported by the description in the specification with the respect to the genus of formula I.

Applicants have amended independent claim 1 to replace the objected term "aminoacyl" with "acylamino" as supported by the disclosure at page 11, line 16. It should be noted that the remaining claims depend on claim 1. Therefore, the present amendment renders the rejection moot. Withdrawal of the rejection is requested.

Claims 1, 3, 20-22, 27, 28, and 31 were rejected under 35 U.S.C. §112, first paragraph, on the basis the specification lacks written description support for the wherein clause at the end of claim 1 ending with "... formed by ring closure between vicinal functional substitutents" for the reasons in item 10 on page 9 of the Action.

For the sole purpose of expediting prosecution and not to acquiesce to the rejection, Applicants have amended claim 1 to remove the objected language at the end of the

claim. Support the amended claim language can be found throughout the disclosure and, for example, at page 7, lines 18-21. Therefore, the present amendment renders the rejection moot and withdrawal of the rejection is requested.

VI. Conclusion

Having addressed all the outstanding issues, the amendment is believed to be fully responsive to the Office Action. It is respectfully submitted that the claims are in condition for allowance and favorable action thereon is requested.

If the Examiner has any comments or proposals for expediting prosecution, please contact the undersigned attorney at the telephone number below.

Respectfully submitted,
